

# WATER WASTED IN ONE MONTH FROM LEAKS

GALLONS

- |   |             |
|---|-------------|
| 1. A slow steady drip ( 100 drops per minute) | 350         |
| 2. A fast drip                                | about 600   |
| 3. A small stream                             | 2000 - 2700 |
| 4. A large stream                             | 4600        |

## When should I call an expert?

If your meter indicates a leak and you can not find it, or if you are reluctant to tackle these tasks, call a plumber or your local water utility.
